## SEMESTER STUDY: FOUNDATIONS OF WESTERN ART

*Note: Details are subject to change.*

### OVERVIEW

In this full-immersion semester program students explore the history and development of art in the western world from ancient Greek beginnings to contemporary art.

The program is introductory but intensive. It is for students aiming to build a strong understanding of western art history and to develop excellent visual skills. It also serves as a gateway program for students with an undergraduate degree in a subject other than art history who hope to apply for a postgraduate programme at Sotheby's Institute.

Students learn about key stylistic developments, methods, materials and techniques. The program also deals with the broader social, political and cultural contexts which defined the shape of artistic achievement across a very long period.

In addition to the art historical content, the program includes a series of sessions entitled 'Talk To The Professionals' during which students have the opportunity to meet museum curators, auction house specialists, fine art dealers, art critics, art consultants and art restorers who will share their own experience of these roles and the paths that brought them there.

## STRUCTURE, TEACHING METHODS AND ASSIGNMENTS

The program is divided into two units taught consecutively across the semester. The first unit explores developments from **Ancient Greece to Baroque** and the second unit moves from **Rococo to Contemporary**. Students are able to take one of the units only, if preferred, or to take both units across different semesters.

The **teaching approach** emphasizes **object-based learning**, enabling students to gain confidence in analyzing and identifying a wide range of art objects, both in a classroom setting and through numerous study visits to **London's world-class collections**. The unique opportunity to study objects close-up enhances students' critical and visual skills.

The teaching is intensive and supportive, with an emphasis on individual and small-group learning.

The course assignments are not limited to essay writing but are also designed to assess a diverse range of skills that reflect a variety of art world professions. For example, assignments include an exhibition review and a group project in which students curate an imagined exhibition.
